DETAILED ACTION

Claims 5-7 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as being unduly broad in that only one means recitation is claimed and does not appear in combination with another recited element of means. *In re Hyatt*, 708 F.2d 712, 714-715, 218 USPQ 195, 197 (Fed. Cir. 1983)

Claims 6-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding Claim 6, "the mark-space ratio" lacks antecedent basis and are not positively recited. Correction is required.

Regarding Claim 8, "the coils" and "the actuator" lack antecedent basis and are not positively recited. Correction is required.

Regarding Claim 9, "the compressor windings" lack antecedent basis and are not positively recited. Correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-9 (to the extent understood) are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Holt et al.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Caillat, Kadah, Sugiyama et al., and Kelley et al. are further cited to show related teachings in the art.
